Hygiene and infection control

Don't take the risk

The most frequent route of infection transmission in healthcare is indirect contact. Choose surfaces that remove the breeding ground for bacteria.

Choose Altro Whiterock™ systems installed by J&M Interiors.

J&M Interiors has been delivering high performing installations in healthcare and other sectors throughout Scotland for more than a decade. Led by experts in the construction industry, J&M has its own team of experienced, qualified installers. This turnkey approach means you can have confidence in a service that aims to complete on time, within budget, to agreed specifications, with minimal disruption and with complete client satisfaction.

Altro Whiterock™ PVCu walling systems provide a hygienic, decorative and practical alternative to ceramic tiles or paint.

Altro Whiterock provides a watertight, seamless surface that is impervious and can be hygienically finished around fixtures and fittings. The fully bonded system includes thermoformed pencil rounded corners giving bacteria nowhere to hide and making it easy to clean and disinfect. Its high durability and low maintenance cost make it an excellent long-term investment.

Choose from standard white, or a range of stylish options such as **Altro Whiterock Chameleon Art™** for front of house applications, or **Altro Whiterock Digiclad™**, with bespoke digital print.

Complete the system with ceilings and doorsets from the Altro Whiterock range.

Introducing Altro Whiterock™ cladding systems

A perfect solution for healthcare environments

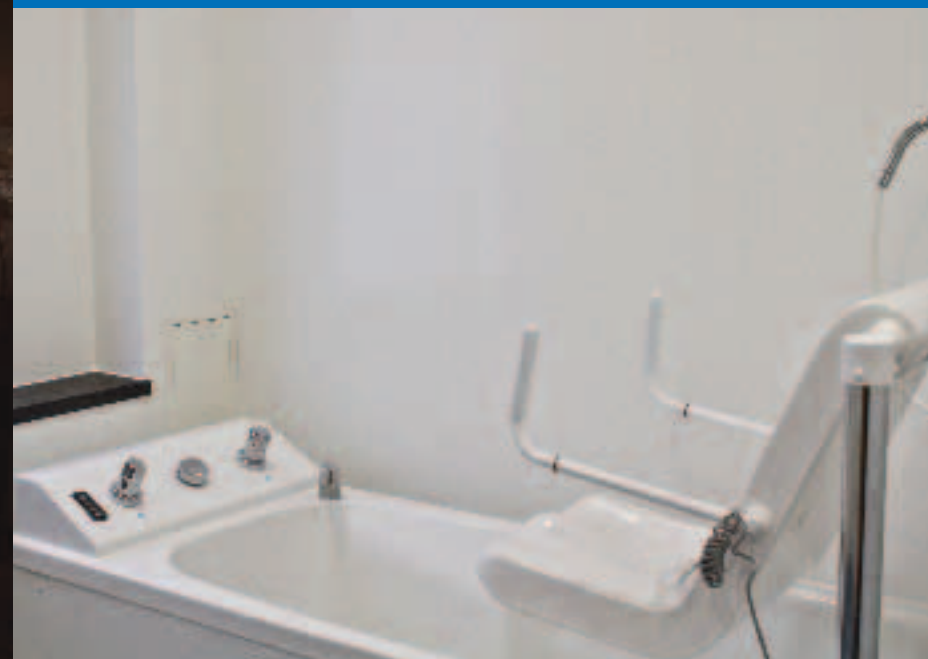

J&M Interiors is an Altro Premier Installer, so you can have confidence that they will deliver the best quality installations using best quality products, giving peace of mind for years to come.

Premier Installers are selected by Altro for their high level of skill and expertise as well as their commitment to Altro's quality values. Their technical and installation staff are trained by Altro and regularly audited to ensure the highest standards are maintained. Altro and their Premier Installers work together in developing new products, finishing details and installation procedures.

An Altro Whiterock system fitted by J&M Interiors is peace of mind for years to come.

Altro Whiterock™ provides an ideal backing for hand wash stations. It includes Altrosan bacteriostat for enhanced hygiene and is impervious and resistant to alcohol-based hand wash solution.

Altro Whiterock™ Hygienic Ceilings form an impervious, hygienic, virtually maintenance-free system which can be hosed down in situ and provide a bright, durable surface which helps reduce condensation. They can be installed as a fully suspended system. They meet rigorous hygiene requirements, making them particularly suitable for medical areas.

Altro Whiterock™ Hygienic Doorsets provide a complete PVCu-faced doorset to ensure the integrity of your hygienic, low maintenance installation. They can be designed for use on their own or as part of an Altro Walls complete system including walls and ceiling.
